

BARRETT®

MODEL 99™

The Model 99 rifle is a robust and accurate single-shot rifle. At its heart is a one-piece Alcoa 7000 series aluminum alloy extrusion. A steel M1913 optics rail is attached to the top of the extrusion by closely spaced high-strength structural fasteners. The match-toleranced barrel is hydraulically pressed and locked into the extrusion, resulting in a rock-solid, unitized structure on which to mount a riflescope. Safety is unparalleled because the cartridge is surrounded by both high-grade gun barrel steel and the aluminum extrusion.

The bolt is machined from a single piece of proprietary grade steel. Its 15 lugs safely lock it into the machined barrel extension. The bolt's few moving parts are its extractor, ejector and firing pin assembly. It is reliable and easy to maintain.

The Model 99 is easily disassembled without tools by removing three quick-release assembly pins. These pins attach the trigger housing and bolt guide to the receiver assembly. The match-quality trigger design is proprietary and virtually maintenance-free. The bipod is easily detached for benchrest shooting.

Other manufacturers may cut corners on quality and design. Barrett does not because even in a single-shot, you get what you pay for. Known as much for its dependability as its versatility, the Model 99 combines smooth functionality with dead-on accuracy, shot after shot.
