BARRETT LIGHTWEIGHT RIFLE

## BARRETT LIGHTWEIGHT RIFLE

We could not find the perfect hunting rifle, so we built one. This rifle is designed to be carried further on long days in the field and perform like a Barrett at that critical moment. The stock is crafted from carbon fiber to provide an ultralight yet stiff platform for shooting from field positions. The actions are scaled for their specific caliber and precision barrels contoured for their application. Fieldcraft is yet another example of how we are going to greater lengths for the precision shooter.

*STARTING AT \$1799*
