M107A1

ENGINEERED FOR ACTION.

What happens when you combine over 35 years of research and development with feedback from the most demanding military end users? You get the M107A1. While it may share the same iconic look and legendary reliability of legacy Barrett firearms, that is where the similarities end.

Utilizing state of the art design, manufacturing, and materials, every component of the rifle has been engineered to be lighter and stronger than its predecessors. In addition to a 4-pound weight reduction, the M107A1 is optimized for use with a sound suppressor, providing a much-needed signature reduction capability to the warfighter. Lighter, stronger, more precise, and more capable; the M107A1 has truly been engineered for action.

MODEL 82A1

THE POWERHOUSE RIFLE.

The Model 82A1 is where the Barrett legacy began. Engineered as the first shoulder fired semi-automatic 50 BMG rifle, the Model 82A1 has been proven in combat in every environment from the snow covered mountains, to the desolate deserts, and everything in between. Its low felt recoil and reliable firepower delivers on target with every pull of the trigger. More than just a rifle, the Model 82A1 is an American icon.
